

Ecoffee Cup AERO™ - a reusable cup for the aviation sector

Designed to replace single-use cups across the aviation sector, Ecoffee Cup Aero™ has been created specifically for flight deck cup holders and crew beverage carriers. Featuring a fully secure lid with drink hole and stopper – and a sleeve to protect from heat – Aero™ is currently available in two off-the-shelf options created for Airbus A319-330 and Boeing. Removing single-use cups from the flight deck and crew can significantly improve safety, reduce costs and prevent waste to landfill.

AERO 

Cups, sleeves and lids are available in a variety of colours, with an option for low MOQ bespoke print.
