

Setting the standard.

Integral bracket

Single clip

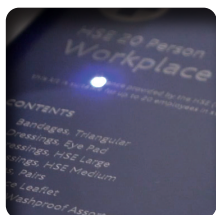

Embossed cross

Easy identification

Tamper seal

Laser etching

aura³ the right kit for your kitchen.

The new Aura3 box is the latest evolution of our flagship design that has been a firm favourite for years.

Now made with **100% recycled and recyclable plastic**, Aura3 stands out from a distance, enabling quick identification in an emergency, especially in a busy workplace. This third-generation box has a striking design, with embossed and printed iconography to help with easy identification across all languages.

The single clip closure enables quicker access with one hand in an emergency. Essential features are retained, including an integral bracket for secure wall fixing, easy portability and, with the addition of a tamper seal tucked neatly under the handle, it can be visually monitored by Health and Safety managers in an instant.

What does the law say?

The Health and Safety (First Aid) regulations 1981 states:

"An employer shall provide or ensure that there are provided such equipment and facilities as are adequate and appropriate in the circumstances for enabling first aid to be rendered to his employees if they are injured or become ill at work"

The following information categorises workplaces by level of risk, and then recommends an appropriate size of kit, depending on the number of employees and members of the public exposed to those risks.

1. DO A RISK ASSESSMENT.

LOW RISK: (e.g. shops, offices, libraries etc.)

HIGH RISK: (e.g. light engineering and assembly work, food processing, warehousing, etc.)

2. DECIDE ON THE SIZE AND QUANTITY OF KITS REQUIRED TO MEET YOUR RISK NEEDS ASSESSMENT.

SMALL KIT USAGE GUIDELINES

LOW RISK: 1 kit for less than 25 employees

HIGH RISK: 1 kit for less than 5 employees

MEDIUM KIT USAGE GUIDELINES

LOW RISK: 1 kit per 25-100 employees

HIGH RISK: 1 kit per 5-25 employees

LARGE KIT USAGE GUIDELINES

LOW RISK: 1 kit per 100 employees

HIGH RISK: 1 kit per 25 employees

	427 SMALL	428 MEDIUM	429 LARGE

ALL BLUE CONTENTS

For many years it has been best practice to use blue detectable plasters in food preparation areas. Our kits far exceed this requirement by providing you for the first time with a kit where the majority of products, including dressings and wipes, are blue. With one of our all blue Catering Kits in your workplace, there is no better way to demonstrate to the authorities that you are taking your responsibilities seriously.
