

LIFEVAC®
EUROPE LTD

3500+ LIVES SAVED
IN A CHOKING EMERGENCY

Regulated Medical Device

LifeVac is a regulated medical device to be used when first aid fails or cannot be performed. Manufactured in the UK, patented one-way safety valve. CE & UKCA marked.

Free CPD e-Learning

We offer free CPD Certified e-learning. This free course covers how and when to use LifeVac in a choking emergency and device overview. Each Kit comes with a multilingual booklet.

Replaced free of charge

When a LifeVac device is used in a choking emergency and reported back to us, we will replace your used LifeVac device and used mask free of charge. Every kit comes with a QR code for free training.

AS SIMPLE AS PLACE - PUSH - PULL

First aid choking protocol is only 70% effective in a perfect situation. This is even less for people with a physical disability who cannot receive current first aid techniques .

LifeVac is a legal option for any person, business or setting to use in a choking emergency when first aid fails or cannot be performed. Due to our patented one-way safety valve, LifeVac can be applied when someone is sitting, standing or laying down.
